

In June 2014 I graduated for the bachelor of design at the Design Academy Eindhoven. As a young designer I am passionate about Product Design, Design research and Communication design. I have an analytical view on the world, an interest in new technologies and find challenge in innovative and logical solutions for modern day problems. Besides my study at the Design Academy Eindhoven I gained a lot of knowledge and skills on several creative educations, internships and projects over the past 10 years.
